**Subject:** Please Don't Punish Apple for the sins of Microsoft!

Please Don't Do It!

I understand that the justice department is planning to hand over a substantial portion of the Education market to the Windows platform by replacing Macs with Windows computers. This is supposedly to punish Microsoft for being a monopoly that does not play fair??? How do you figure that?

I use Macintosh (Apple) computers. It is a wonderful platform. It has done nothing wrong! Why are you punishing Apple??

I am in the design industry and Macintosh (Apple) is the only platform that I want to use. Please don't hand over the Educational Market to the Windows platform!!!

This proposed settlement gives Microsoft a big boost in a market segment they have been unable to dominate - one which Apple has a razor thin majority right now.

Why is the court ready to kill a substantial portion of Apple's market and hand it to Microsoft? How does this punish Microsoft?? Why are you punishing Apple?

I am writing to you because I am told that you are dedicated to continuing with more effective anti-trust remedies.

I'd be interested in your thoughts and actions regarding this issue.

Thank you
